MEASUREMENT TRACEABILITY

Learn the simple steps to measurement traceability

This half-day workshop is aimed at staff who make decisions about calibration, use of equipment and reference materials.

It's also very useful for anyone involved in quality assurance activities.

Course outline

Participants will refresh their knowledge of traceability and develop appropriate strategies for ensuring the traceability of test results. The aim is for laboratory staff to intelligently evaluate the traceability of calibrations and reference materials and where needed, respond to the requirements of NATA's [Metrological Traceability Policy](#).

Your lab may not need traceability to SI units – in fact, depending on what you're testing, it may not be possible. However, you still need to demonstrate measurement traceability in your lab.

In this one day interactive workshop you will:

- Learn what measurement traceability really means in a practical sense and how it relates to your lab
- Work through your methods, pull them apart and determine just what's required – and what isn't
- Discuss the interface of the customer's needs and your traceability requirements
- Learn how to demonstrate metrological traceability during a NATA assessment

Why is our course different? Because we work through a method from your lab to ensure what you learn is of immediate and practical benefit!

PLUS you'll get hints and tips on what to look for and how to answer questions from external auditors such as NATA.

We have extensive experience, including as NATA auditors, providing you with valuable insights into an external auditor's mindset. Plus, we've seen first hand what works (and what doesn't) across businesses just like yours.

BONUS: Often there are questions after you've completed a training course. So we don't leave you high and dry once the day is over. We'll be in touch a couple of weeks after the course to make sure you're on track and answer any further questions.

All participants will receive a certificate of completion at the end of the course.

**** COURSE COST: \$374 PER PERSON ****

IN-HOUSE TRAINING: As well as saving you time and money, in-house training ensures consistency of message across your business. **PLUS we train your staff on your premises using your processes.**

Discounts apply for group training so contact us for further information about this option.
